From raw LC–MS data to measurable features

01 Raw LC–MS signals

Signals across m/z and retention time

02 Detect & integrate peaks

Locate peak boundaries and quantify area

03 Feature table

Feature	m/z	RT (min)	Area*
F1	180.065	1.60	0.450
F2	255.233	3.10	0.487
F3	310.202	4.60	0.472

*Illustrative integrated signal (a.u.·min)

Summarize each detected feature

Illustrative data • One sample • A feature does not necessarily represent a unique metabolite
